Perspectives on Music

Please suggest songs that may be your favorite. New songs are always under development.

I am available for weddings, parties, special events, grand openings, business functions, etc.
Please review my website at www.paulsearlesmusic.com for music samples, references, photos, biography and pricing information.

I can perform solo with an acoustic guitar and my own voice, no PA system. I can also perform with a large PA system and with my own backup CD tracks that I created in my home recording studio. I also perform with a Rock and Roll band called the Rock Doctors.

Sometimes folks get my CD backup confused with Karaoke or computer sequenced music. My CD is not quite the same. Much of the music that I perform live at various venues has my own CD backup tracks. In my recording studio, I record myself playing the bass guitar, keyboards, drums, steel drums, lead and rhythm guitar, lead and harmony vocals and other various parts (like orchestra strings, a Hammond B3 organ) of a song on a 24-track digital workstation.

So, for instance, when the Eagles song "New Kid In Town" requires a lot of vocal backup harmony, I sing all the parts and record the vocal tracks along with all the other instruments in my

studio and then mixdown to a backup CD. I remove the lead vocal part and a guitar track on the backup CD for my public performances.

If a client prefers a "full band sound", I can provide that through my "one man band" CD backup. I sing and play guitar live over the CD so that it sounds much like the how the original song was recorded.

So, I hope you enjoy the music that I love to perform whether it is solo acoustic or with my backup CD band.

Thanks for your support.
